

GUILHERME HOLANDA

Senior Software Engineer | Backend & Full Stack · Recife, Brazil (Remote)

guilhermeholanda519@gmail.com | linkedin.com/in/guilherme-holanda-56359124a

SUMMARY

Senior Software Engineer with 3+ years of experience building backend and full stack products, focused on event-driven systems, AI integrations and quality engineering. At Amigo Tech, core engineer of **Amigo Flow**, an AI-powered WhatsApp CRM that reached **R\$400K MRR in 6 months**, and **AmigoPay**, a payments module processing **BRL 20M+/month** across 1,000+ clinics.

TECHNICAL SKILLS

Backend: Node.js, NestJS, TypeScript, Express, REST APIs, Microservices, Event-Driven Architecture, Socket.IO

Data: PostgreSQL, MongoDB, Redis (caching & queues), TypeORM, Prisma

AI: AI Agent Integration, RAG, MCP, LangGraph, LLM Workflows, N8N, Claude Code, Codex

Testing & CI/CD: Jest, Vitest, Cypress, Playwright, Jenkins, OpenTelemetry, TDD

Frontend: React, Next.js, Tailwind CSS

Integrations: WhatsApp Cloud API, PIX, Boletão, Card Terminals, Webhook-driven Payment Pipelines

EXPERIENCE

Amigo Tech — Healthtech / Fintech SaaS · 50K+ doctors, 5K+ clinics Jun 2024 – Present
Senior Software Engineer & Tech Lead (Dec 2025 – Present) · Mid-level (Feb – Nov 2025) · Junior (Jun 2024 – Jan 2025)

Amigo Flow — AI-powered WhatsApp health CRM | NestJS, React, Socket.IO, Redis, PostgreSQL, MongoDB

- Core engineer from inception to launch of the company's **fastest-growing and top-selling product**, reaching **R\$400K MRR in 6 months**.
- Scaled to **10M+ messages in the first 90 days** and **3.5M+ messages/month** across 50+ clinics, designing an event-driven webhook architecture (Redis queues, Socket.IO) handling **50K+ campaign dispatches/day**.
- Integrated AI agents into the platform in close collaboration with the AI team, connecting them to the scheduling API via MCP; the agents handle **80%+ of patient interactions** and resolve **43% end-to-end** without human handoff.
- Led architecture discussions and communication with product and pilot clinics, turning feedback into specs and prioritized deliveries.

AmigoPay — Financial automation module | NestJS, PostgreSQL, Webhooks, PIX, Boletão

- Built a payments module now processing **BRL 20M+/month across 1,000+ clinics**, after surpassing **BRL 7.5M TPV** in its first year.
- Integrated PIX, boleto, card terminals and installment billing, with reconciliation and automated payment pipelines; passed an external pentest with **zero vulnerabilities**.

Tech Lead & Engineering Quality | Jenkins, Jest, Vitest, Cypress, Playwright

- Drive technical direction, code review and delivery planning for Amigo Flow while shipping features daily.
- Built Jenkins CI/CD pipelines with unit, integration and E2E suites as quality gates across multiple environments.
- Introduced AI-assisted workflows (Claude Code, MCP servers) to the team for code review, test generation and planning.

Freelance Software Developer 2023 – May 2024

- Built web apps and APIs for independent clients with TypeScript, Node.js, React and PostgreSQL, owning the full cycle from requirements to deployment and support.

EDUCATION

B.Sc. in Computer Science — Universidade Católica de Pernambuco (UNICAP) 2022 – 2026
